

I have reviewed the Tobacco Institute Testing Laboratory tar and nicotine reports since the initial report was issued in March, 1968. Only in reports dated April, 1977, November, 1977, September, 1978 and October, 1979 were the data reported on cigarettes delivering 1 mg or less tar. The following cigarettes delivered less than 1 mg tar as reported by the TITL reports:

	<u>Tar, mg/cigt.</u>	<u>Nicotine, mg/cigt.</u>
<u>April, 1977</u>		
Carlton 70	0.1	0.03
